Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I: Claims 1-6, drawn to a package, classified in Class 206, subclass 459.5 and others.

Group II: Claim 7, drawn to a photographing method for observing a three-dimensional image, classified in Class 396, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are independent and distinct because there is no relationship between the package having images and the photographing method for observing a three-dimensional image since with the package and the photographing method can be used by itself and are independent and distinct from each other.

Because these inventions are independent and distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.
